ABOUT ME

Frontend Software Engineer with 7+ years of experience delivering scalable, high-impact web applications for companies like Mercado Livre, IBM, and AB InBev. At Mercado Livre, I lead frontend development of a large-scale internal platform processing $3B+ monthly, while also building the shared libraries, component systems, and architectural foundations that other engineering teams rely on. Skilled in React, TypeScript, and frontend architecture, with a strong focus on clean code, internal tooling, and intuitive UX. Known for end-to-end ownership, technical excellence, and a product-driven mindset.

WORK EXPERIENCE

Mercado Livre

Senior Software Engineer, Frontend | Jan 2025 ~ Present | Osasco, SP – Hybrid

Software Engineer, Frontend | Mar 2024 ~ Jan 2025| Osasco, SP – Hybrid

Leading frontend development of a large-scale tax management platform supporting over $3B/month in fiscal operations across Brazil and Argentina. Working with React, TypeScript, Node.js, Nordic, and Fury to deliver scalable dashboards and workflows for tax declaration and reconciliation. Actively involved in architecture, API contracts, technical decisions, and collaboration with UX, product, and backend teams.

- Promoted from mid-level to senior after 1 year. Act as an informal team lead among 5 frontend developers, driving technical decisions, mentoring teammates, and ensuring code quality.
- Created Melitax UI, an authorization library, and led a Microfrontend migration that enabled multiple teams to work in parallel.
- Built a plugin repository centralizing reusable skills and integrations for key applications across the Melitax ecosystem. Using Claude, OpenAI Codex, MCP, and specialized AI workflows, accelerated the delivery of Melitax's core tax declaration capability by 50% in Q2 2026. The capability is now used for tax declarations and fiscal artifact generation across more than 20 provinces in Argentina.
- Led the migration to Mercado Livre's new internal authentication system, designing the migration path, building supporting libraries, and creating documentation and examples adopted by other Melitax teams.

levva

Software Engineer, Frontend | June 2021 ~ February 2024 | Campinas, SP – Remote

Developed global-scale solutions at Levva as a consultant, first contributing to Ambev's B2B platform BEES, used by 800k+ clients and handling R$9B in Q2/2021. Later transitioned to a project at Stoller, the world's largest bio-stimulant and plant health company, building a mobile app to manage product demos across farms—tracking fields, visits, and applied treatments. Used React, React Native, and NodeJS to deliver high-quality web/mobile apps with strong focus on UX, performance, testing, and security.

- Joined as a mid-level developer and promoted to Senior after 2 years, later becoming Tech Lead. At BEES, implemented user event tracking using Segment and Amplitude, enabling data-driven insights and improving product decision-making—leading to a 30% grow in adoption of underused features within 3 months. At Stoller, helped implement offline-first support in the React Native app, enabling field agents to work without internet access—reducing failed form submissions by 45% in areas with poor connectivity.

IBM

Frontend Web Developer | March 2020 ~ June 2021 | São Paulo, SP – Office

Contributed to the development and maintenance of pages on IBM.com, leveraging skills in Javascript, ReactJS.Worked on the IBM Carbon Design System, creating components documented with Storybook, ensuring consistency across all IBM digital platforms.

- Enhanced IBM Blockchain landing page performance by 10%, implementing bundle optimization, lazy loading, and caching techniques.

Quality Assurance Specialist | May 2018 ~ March 2020 | São Paulo, SP – Office

Quality assurance of the most important pages under IBM.com, with constant compliance validations following the international standards for accessibility (WCAG) as well as the internal design standards for IBM.com, working closely with the agile team to provide the best experience and security for the user on IBM.com.

- Reduced the quality assurance validation duration in 36% and the broken link rate in 15% with the creation of browser extension that facilitates processes previously done manually, to this day, still being used by the whole QA team for web.

EDUCATION

Mackenzie Presbyterian University

Systems Analysis and Development

Dec. 2020 | São Paulo, SP

- College of Computing and Information Technology

SKILLS

Technical Skills

JavaScript • TypeScript • React • React Native • Next.js • Node.js • Redux • Jest • Cypress • GraphQL • MongoDB • AWS • Docker • Webpack • Babel • HTML5 • CSS3 • Storybook • Figma • SonarQube • New Relic • Braze • Segment • Git/GitHub • Systems Design

AI-Assisted Engineering

Claude • OpenAI Codex • MCP • AI Agents • Reusable Skills • Specification-Driven Development • Prompt Engineering • AI Tool Orchestration • AI-assisted Code Review

Soft Skills

Bilingual Communication (Fluent English, Native Portuguese) • Technical Leadership • Problem Solving • Systems Thinking • Organization • Self-directed Learning • Teamwork

PROJECTS

SpendBox

Oct. 2022 | Personal Project

Website to help visualize how much money the richest people in the world have by allowing you to spend their fortune on multiple products (Website)(GitHub)

React • Chakra UI • NodeJS • Forbes API • JavaScript • Typescript • CSS • HTML

OhNoCoiner

Apr. 2021 | Personal Project

Website to check how much money you would have if you had bought cryptos at specific date (Website)(GitHub)

React • NodeJS • CoinDesk API • JavaScript • CSS • HTML

Openbook

Jun. 2020 | Mackenzie Presbyterian University

Open-source social media for data-science students/researchers. (Website)

Vue.js • VueX • Vue Router • NodeJS • Express • JavaScript • CSS • HTML

FUN FACTS

Volunteering

In my spare time, I enjoy teaching friends and children from my hometown in Brazil about the basics of programming. As someone who grew up in a less fortunate area, I find it rewarding to share my knowledge and help others learn skills that could open up new opportunities for them in the future.

Hobbies

Gaming • Music (Playing Guitar/Singing) • Drawing • Competitive Programming • Investing
